- 25X1 1. [ ] Comment. Part of the shipments was possibly consigned to the KVP.
- 25X1 2. [ ] Comment. A repair shop of the GORC for the repair of medium tanks including model T-34 tanks is located at Wuensdorf. The repair shop has a monthly output of about 20 overhauled tanks. [ ] Efforts
- 25X1 are being made to increase the monthly output. It is assumed that, in addition to the tanks recorded in the present report, tanks left the repair shop by road for tank units in the surroundings of Wuensdorf. In May, about 45 tanks
- 25X1 in need of repair arrived at the repair shop from the USSR. The tanks will possibly be shipped to KVP units after overhaul. [ ]
